

Case Study: The Limits of Red Pill

You can only go so far on your own.

Is there anything Red Pill can't do? Actually, yet.

Roissy wrote an essay called The Limits of Game back in 2007.

I remember being a young, fresh faced sailor back then. Twenty years ago. Twenty years! This was in my prime sport fucking years, and it was the only game in town to have a good chuckle about whamen, or some pithy aphorisms that resonated with my own sexlife. We all had Return of Kings, Rational Male, or Chateau Heartiste, that's it. People are spoiled for choice, but also starving for quality in 2026. Your choices are now between a Sudanese migrant bitching about black women like he read about them in a book, or a K Pop inspired swamp Chad who may or may not be playing gay for pay in his waning social media

popularity, or a racially ambiguous global citizen playing Catch Me If You Can: the home game.

Hint: He and his twin brother got caught.

Our Predictions Were Wrong.

I've written about the Limits of Game before. *The gist is that game is a force amplifier, more effective than money and attractiveness, but there's a shelf life. It's longer than a woman's peak years, but it exists.* And the more guys try to quantify the grey area of sex, the more autists inflate the numbers to scare guys into being their online friends and revenue streams. Typical of men at the tail end of the bell curve, they would rather drown the men attempting to save them from the seas than learn how to swim.

In this weeks case study, I'm reminded of the singular problem in this Red Pill space. The problem? A regression to the mean. One of the best critiques I've seen from the peanut gallery against this space was the admission that all of the game and frame material here is meant for the average guy who wants to be better, and not for the clueless, hopeless, or retarded to carve out their Bugatti harem. The more popular the space became, the more it regressed to the mean, the more the inflationary autistic saw the tail end of the bell curve as a cash cow of hopelessness.

And I see it happening in a slow moving steam roller. The more I want a series of field reports of guys overcoming the worse, the further back I have to go. The more I want cautionary tales, the more recent I can be. The material didn't get worse, men haven't gotten worse, things just got popular. It's a good problem to have, but it's a problem. It vindicates my strategy of aggregating and archiving everything from the past so it

isn't lost in the annals of time, or the anus of the Dead Internet Theory, depending on your perspective.

Any marketing expert worth his weight in salt will sell you on this space being the panacea of everything from Liberalism to Loserdom, from celibacy to currency, or from malaise to momzillas. It's all made up horseshit. I know this because I need the horseshit to sell the useful stuff as well. I scrubbed toilets as a sailor in the RCN, which allowed me to circumnavigate the globe, and so I can scrub toilets here.

The takeaway for you, dear reader? You might just be the tail end of the bell curve, the cash cow for guys who can't make their fortune in a more reputable trade, like drug dealing or pirated DVD sales. Thankfully all hope isn't lost. I can entertain you while you subsidize the guys who are worth a damn and have the potential to use this material so they don't have to pay thousands of dollars. So there's no hate in my heart when I say this, but good men stand will on the shoulders of giants, and there's a small nobility in being the shoulder.

This Billy is a guy with pseudonym Mean Physics. A 6 foot tall 200 pound man with an 8 year marriage and 2 kids under 5. He was angry with his wife, mostly for being held hostage by her fickle emotional state (read: Type 2 Captain) lackluster sex life and a general malaise.

The reason I chose him is because the Billy's like this focus on what matters, and not on avoiding it. Call it toxic shame (Glover, No More Mr Nice Guy) or avoidance, it doesn't matter. He doesn't focus on the 'after the sex, then what?' because he knows that's a tomorrow problem, when he needs to use today solutions. It's almost boring in it's honesty and efficiency.

But First, the aggregation of the information that I'm referring to.

Frame

Dread

For 15 years of men sorting this stuff out for themselves and coming to working solutions, distilled for you to use as you see fit

Billy, Year 2

Stats: 37yo, 6'1", 194lbs, 14%bf. Married 8 yrs, together 12. 2 kids, 5 & 3. Bench 300, OHP 170, Squat 295. I've read: Rational Male, NMMNG, MMSLP, WISNFG, Book of Pook, Models, Bang, Day Bang

I swallowed the pill 22 months ago. First OYS. I figured I could do it on my own, but haven't gotten the results I need...
